

**STEEL SECURITY BAR**

"Electronic Warning systems are not as effective in preventing burglaries when used without a strong physical barrier."

A strong, physical deterrent is the best way to prevent today's criminals from breaking in. Modern criminals are fast and efficient and often require no longer than three minutes to complete their burglary. This means electronic alarm systems are not as effective when used without a strong physical deterrent.

Exit's heavy-duty security bar is ideal for many commercial exits regardless of door size. The exit bar is designed for single or double doors, in swinging or out-swinging functions. This bar features a unique, patented, hook-on-lift-off operation that is easy to use and emergency sensitive. Use of a padlock is optional to secure the bar in bolted or unbolted positions. (Comply with local building codes).

- Easy installation, no door or door frame preparation is required
- Easy operation on a daily basis
- 1 year warranty
- Major parts manufactured of 16-gauge square steel tubing (1" and 1¼")
- "L" bolts are 6½" with zinc chromate finish
- The bar(s) are finished with gray electrostatic powder epoxy baked on to a semi-gloss finish
- Graphics silk-screened of red epoxy
- Finishes test-proven protection against corrosion, including salt corrosion
